Minnesota is home to more people with refugee backgrounds per capita than any other state. In the past ten years, the groups resettling to Minnesota have been increasingly diverse and from nontraditional ethnic communities. Child welfare workers may encounter people from new refugee communities in their work. This guide provides information and resources to assist child welfare workers in providing culturally responsive, appropriate services to meet the unique needs of families with refugee backgrounds. This resource guide includes specific resources for two of Minnesota’s newest refugee communities (Bhutan and Burma). Additional resources for Minnesota refugee communities can be found on our website.
