Disciplinary Incident Reporting System (DIRS)

DIRS contains information on disciplinary incidents that remove a student from school grounds for one day or more.

Data available from academic years 2008-2009 through 2015-2016

DIRS data comes to Minn-LInK in text files from the Department of Education. Data are organized at child level by MARSS ID. The MARSS ID is a unique identification number given to a child when they first enter the public school system and the same ID follows them throughout their public school education.

*Please note: DIRS data is housed at Minn-LInK, but requires an additional request process with MDE for use. For further information, please contact the CASCW Director of Research & Evaluation, Kristine Piescher at kpiesche@umn.edu

Data provided in DIRS:

- MARSS ID of offender
- Academic Year the incident was reported
- Description of the type of incident
- Description of the disciplinary action type
- Number of days student was out of school for disciplinary reasons
